

THREE DR. MEUSER PIECES

by
Rick Waibel
South Charleston, OH

Three pieces from Dr. Meuser's collection are shown. At the top is a Double-Crescent made of banded slate — catalog number 2307/5. It was found 4 miles west of Celina, Mercer County, Ohio. It is particularly unusual that such a rare artifact has survived in whole condition.

The bottom two pieces are Adena Expanded Center gorgets made of sandstone. One is undrilled which is a common attribute of the type.

Dr. Meuser greatly enjoyed Expanded Center gorgets and was especially fond of those made of sandstone.
